

AWARD 2017

Partnerships between cities/regions and the social economy: Transforming challenges into opportunities

The third edition of the REVES Award emerges in a **scenario full of important policy debates at the European level**: the mid-term review of the Multiannual Financial Framework 2014-2020, including the European Structural and Investment Funds, the shaping of the European Pillar of Social Rights, but also the precious opportunity of integrating the social economy sector in a European Action Plan.

More than ever, Europe is facing the **urgency of a governance reform**, able to take into account the real needs of communities and people, and putting the latter at the core of solution paths aimed at tackling unmet needs and problems.

The REVES Excellence Award has precisely the objective to make real alliances between local/regional authorities and the social economy, as well as their achievements, more visible. At the same time, it aims to foster the emergence of new partnerships between these two players.
