

Fostering collaboration through mapping, analysing and interlinking of European Entrepreneurial Regions

Final Workshop

Putting action plans into practice

The aim of the workshop is to:

- Take stock of the main results of the project,
- Present how to go from action plans to actions,
- Support further policy exchange.

June 2020
22/23

The EU project called 'Fostering collaboration through mapping, analysing and interlinking of European Entrepreneurial Regions' was launched with the objective to strengthen the impact of existing actions aimed at further developing start-up and scale-up support by building on the experience of the EER initiative of the Committee of the Regions. The project partnership fosters the development and implementation of concrete collaborative action plans that will support scale-ups and entrepreneurs along common thematic priorities. This workshop is the final event of the project, and will also serve as an introduction for the new phase.
