A new EIAH Initiative: URBIS

- Advisory services for EU cities of all sizes
- Three work streams:
  - Awareness raising
  - Tailor-made project and programme advice
  - Innovative financing solutions
- Focuses on investment support: project development, linking strategy to investment, and innovative financial instruments and structures
A new EIAH Initiative: URBIS

1. To provide dedicated investment advisory to urban authorities for projects or programmes of at least €20 million

2. Focus on integrated urban development programmes comprising a number of smaller projects within a strategic framework with a short to medium term time horizon, typically 3-5 years

3. Technical advice to support the development of urban investment strategies and investment programmes and to improve the quality and bankability of projects

4. Financial advice to support the development of innovative financing solutions for city investment, including urban-based investment platforms
Active URBIS advisory assessments

- Support for the development of a comprehensive financial plan for a new bus rapid transport system to serve a cross border urban agglomeration area
- Support to a municipality in the development of a circular economy strategy as well as its application within the implementation of a municipal PPP project
- Support for a study on a market demand structure to enable affordable housing investments aligned with social inclusion goals
- Support to a Climate Resilience Strategy through development of projects addressing climate mitigation and natural disasters
- Smart cities investment platform, including identification of project pipeline for local and regional investment projects
- Project implementation support for an investment programme developed to address urban regeneration
What are Investment Platforms?

- Dedicated financing structures, co-financing or risk-sharing arrangements, channeling public and private financing from entities, to finance a number of investment projects
- Flexible concept
- With a defined geographical or sectoral/ thematic scope
- Potential tool to use EU funds, financial instruments or national support together with EFSI to support specific policy objectives
- Or to facilitate/ organise co-financing with NPBs and other parties
- But they are not magic tools that would transform non-bankable projects into bankable projects. They must include credible business proposals and credible identifiable promoters
Investment platforms - Context

• The EFSI regulation 2.0 emphasis on Investment Platforms – a tool for pooling and aggregating investments on a sectoral and/or geographic basis

• EFSI/ESIF combinations are of growing importance and viewed to be a key means of increasing EFSI deployment in cohesion countries

• Limited ESIF resources in more developed regions, can be augmented with EFSI to pilot Investment Platforms and attract private investors (at fund and project level)

• EIAH is a very useful tool in providing advisory support
FAQs about the Advisory Hub

What is the geo scope of the Hub?
The European Union.

Does the Hub provide financing?
The EIAH does not provide financing of any sort. Requests for financing addressed to the Hub are redirected to relevant resources as appropriate.

Does the Hub have local offices?
Currently the Hub operates mainly via the EIB headquarters in Luxembourg and its local offices. A network of local partner Institutions is developing.

Is the Hub only linked to EFSI projects?
No, support will not be limited to projects to be financed by EFSI (and/or the EIB).

Who concretely delivers the advisory support provided via the Hub?
Experts of the EIB, its partner institutions and/or appointed external consultants.

Is the support provided via the Hub free of charge?
In most cases, yes. A contribution may be requested from private sector beneficiaries in order to align interests and ensure ownership of results.
Thank you for your attention!
