Urban growth with green ambitions, healthy city and climate adaption
Integrative and systemic approach for ‘healthy urban living’
Vision Green Structure Utrecht 2017

Aim:
1. Improve and create green/blue connections;
2. Increase the volume and improve the green in the city;
3. More green around the city;
4. Healthy urbanisation;
5. Climate adaptation;

Indicators:
- Quantity of green per m2 per household;
- Distribution of satisfaction about green structure in and close to Utrecht;
- Accessibility
Implementation with
