20% reduction
GHG emissions

282 200 tonnes
CO₂

Covenant
of Mayors
Signatory

The Covenant of Mayors for Climate and Energy brings together local and regional authorities voluntarily committing to implementing the EU's climate and energy objectives on their territory.

This unique bottom-up movement, which started in 2008 with the support of the European Commission, now counts over 7,000 signatories.

In 2015, the initiative took on new objectives: the Covenant of Mayors for Climate and Energy steps up the initial CO₂-reduction commitment and includes adaptation to climate change. Signatory local authorities share a vision for making cities decarbonised and resilient, where citizens have access to secure, sustainable and affordable energy.

They commit to developing Sustainable Energy and Climate Action Plans for 2030 and to implementing local climate change mitigation and adaptation activities.

The group of CoR's Covenant of Mayors Ambassadors is composed of local and regional elected politicians whose regions and cities are already signatories/coordinators of the Covenant. Their mission is to act as climate emissaries, speaking at international events and encouraging towns, cities and regions to join the Covenant of Mayors.

Covenant signatories are supported by the EU, facilitating technical and financial assistance for the design and implementation of sustainable energy and climate measures.
